

TOTALFLASH™

CAVITY-WALL DRAINAGE SYSTEM
by Mortar Net USA, Ltd.

Special Sizes for Restoration or Remediation Jobs, Too!

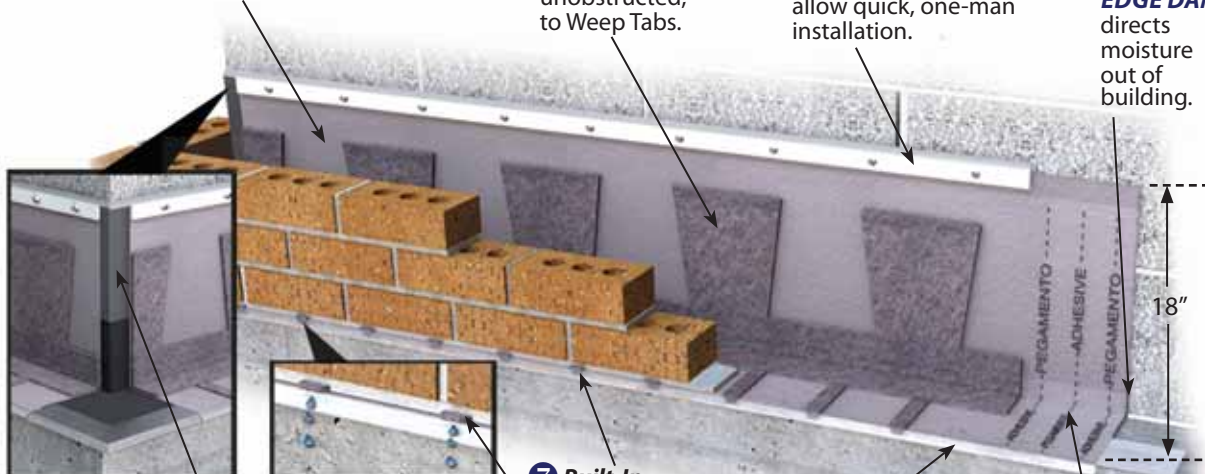

Ask us about Made-to-Size Zero-Waste TOTALFlash panels for New Construction or Restoration.

1 5-1/2 ft. Panels of PRE-CUT FLEXIBLE FLASHING*
All main components are factory-assembled onto easy-to-mount flashing panels.

2 Built-In NO-CLOG DRAINAGE MATTE
lets water pass, unobstructed, to Weep Tabs.

3 Built-In TERMINATION BARS
with pre-drilled holes, allow quick, one-man installation.

4 Built-In EDGE DAM
directs moisture out of building.

Pre-Formed **CORNER BOOTS, STAINLESS STEEL CORNERS & END DAMS** are available, for "perfect" corners every time (over 20 pre-formed shapes).

7 Built-In NO-CLOG WEEP TABS
deliver moisture to the outside of the building.

6 Built-In STAINLESS STEEL DRIP EDGE
releases moisture away from building.

5 Clearly Specified LAP JOINTS
enforce complete, secure coverage.

SCREWS & ADHESIVE TUBES INCLUDED
in each box of TOTALFLASH™

**Standard height is 18"; 12", 15", and custom heights and configurations are available for restoration work, windows, doors, etc. Uses 40-mil polymeric, reinforced, UV stable flashing membrane, incorporating DuPont's Elvaloy® KEE polymer.*

With TOTALFLASH™ - Everyone Wins!

Flashing alone isn't enough to meet today's rigorous moisture-control demands. But until now, higher protection meant higher expenses for time & labor.

TOTALFlash™ changed all that, delivering higher protection with lower costs. But the benefits don't end there:

BUILDERS see quicker completion while lowering the risk of future wall-damage or mold-growth.

MASONS no longer have to order an array of components, then hope everything arrives on time.

- They no longer have to struggle with "field-cutting" awkward flashing-rolls.

- Our Pre-Formed Corners get them off to a quicker start and you can choose from over 20 preformed shapes to fit the specific conditions of your project.

- **TOTALFlash™** high-speed installation lets them start laying brick much sooner.

ARCHITECTS get the coverage (and components) they specified. Our patented **TOTALFlash™** design and clearly marked lap joints assure a 6-inch overlap - every time.

OWNERS enjoy greater peace-of-mind and a longer building-life.

TENANTS breathe easier, knowing there's far less chance of moisture-related illness.

IT'S 100 YEARS OF MOISTURE-CONTROL TECHNOLOGY THAT YOU CAN HOLD WITH ONE HAND.

Wondering how anyone could give you twice your usual protection (or more), with half your usual time & labor (or less)? Just see what our masonry experts have managed to build into each handy, 5-1/2-foot panel of premium flashing.

TOTALFLASH™
CAVITY-WALL DRAINAGE SYSTEM
by Mortar Net USA, Ltd.

STOP Cutting Corners

The job starts with corners, but you don't have to make them by hand any more. Our seamless, factory-formed Corner Boots, End Dams and special Shapes save you time & trouble. More than 20 to choose from.

And of course our "all-in-one" TOTALFlash™ arrives with each panel already pre-cut to a handy, 5-1/2-foot length. (In-Stock and Custom Sizes available for Restoration/Remediation/ Lintels. See inside.)

NOTHING Faster

TOTALFlash™ can be installed by one worker, at speeds twice as fast as anything else they've used. Half the labor, half the time--it adds up to nice savings all around.

NOTHING Protects Better

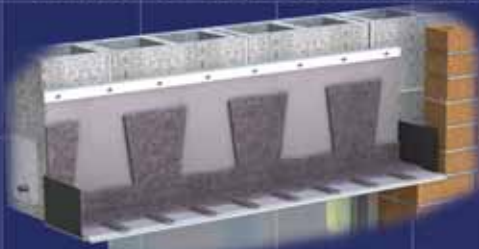

For example, even when mortar or grout droppings pile up to the top of the dovetails, water will still escape through TOTALFlash™ layer of no-clog polyester mesh.

Restoration? Remediation? NOTHING Beats TOTALFlash!

Imagine: Flexible panels, made in the exact size you need for those narrow wall openings! No hand-cutting of flashing rolls, no other parts to install, and TOTALFlash™ covers rough back-up walls like a charm. You'll save at least 50% in Time & Labor costs!

NOTHING Works Better at Lintels

Made-to-Size. No Waste.

Each made-to-size handy panel of TOTALFlash™ installs in a Flash above doors, windows, or other openings. The result is faster installation - and **no waste**. Just send us your takeoffs and we'll do the rest!

Healthier Masonry=GREEN

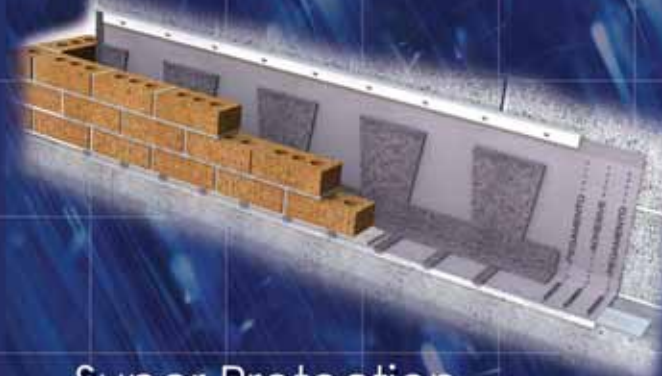

Premature wall-failure can mean re-spending and wasting all the energy costs that went into manufacturing, shipping, and laying the original masonry. TOTALFlash™ promotes longer life for exterior masonry, plus better interior air quality. And since it's "all-in-one," everything arrives in a single delivery, saving even more energy.
