for Masonry

HELPS KEEP HOMES WITH MASONRY CAVITY WALLS DRY

Technical Data Sheet

Description

Mortar dropping collection device for residential masonry cavity walls

Benefits

- Trapezoidal shape breaks up and suspends mortar droppings above the flashing on two levels so weeps stay open
- 90% open-weave mesh construction provides hundreds of pathways for moisture to exit the cavity
- Patented Insect Barrier helps prevent wall damage and health hazards from insect infestations
- Allows proper air movement in and out of the cavity to help promote drying

Sizes and Packaging

THICKNESS	HEIGHT	LENGTH	LF/BOX
0.4"	7-3/4"	5'	80 LF
1"	7-3/4"	5'	80 LF
2"	7-3/4"	5'	80 LF
