Technical Data Sheet

Description

DriPlane provides a continuous drainage plane between the structural wall and exterior veneers such as adhered masonry, sidings, and other forms of absorptive cladding as well as most types of rainscreen systems. It allows rapid drainage and drying for residential and commercial walls.

Features

- Polypropylene mesh bonded to a water and vapor-permeable membrane
- Convenient 48" rolls for rapid coverage and fewer seams
- Available in 3/8" (10mm), and 3/4" thicknesses

Sizes and Packaging

THICKNESS	ROLL WIDTH	ROLL LENGTH	FT ² /ROLL	DIAMETER	WEIGHT
3/8" (10mm)	48"	45'	180	17"	16.7 lbs
3/4"	48"	50'	200	24"	18.8 lbs
