Installation Instructions/Packing Slip

INSTALLATION GUIDE A
TotalFlash Installed Behind Rigid Insulation Board

Notes:
• The use of Carborundum Saw blades to cut the Stainless Steel Drip Edge can result in a slight surface rust on any exposed metal.
• Muriatic Acid at any dilution is not recommended on Stainless Steel.
• Uses a 5/32” Drill Bit & 5/16” Nut Driver

1  STEP ONE
Apply sealant / adhesive to prefabricated Stainless Steel Corner A using 1 bead of adhesive.

2  STEP TWO
Install pre-formed 14” Corner Boot B using 1 bead of sealant / adhesive.

3  STEP THREE
Begin TotalFlash installation at the leftmost corner using the TotalFlash starter strip.
Install starter strip C adjacent to corner drip using sealant / adhesive applied horizontally behind termination bar and drip edge and two beads vertically at ends of TotalFlash panel as shown to the right. Install subsequent sections of TotalFlash from left to right.

Sealant / Adhesive sets up quickly:
Install Drip Edge turn down bend, flush with the top corner of the veneer material. Install TotalFlash without a Drip Edge flush with the face of the veneer material following all current published industry standards. Create the crease at Drip Edge & backup wall until tight. Work the TotalFlash up the wall creating a smooth tight fit. Attach Termination Bar to the backup wall. Termination Bars may not align horizontally.
**Installation Instructions/Packing Slip**

**STEP ONE**
Apply sealant / adhesive to prefabricated Stainless Steel Corner A using 1 bead of adhesive.

**STEP TWO**
Install pre-formed 14" Corner Boot B using 1 bead of sealant / adhesive.

**STEP THREE**
Install TotalFlash Behind Rigid Insulation Board.

**STEP FOUR**
Install remaining sections using the lap system and sealant / adhesive. Caulk top of termination bar D. Loose brick units can be used to temporarily hold down TotalFlash while sealant / adhesive cures.

**STEP FIVE**
Install remaining rigid board insulation over TotalFlash. Lay a mortar bed directly atop the TotalFlash weep tabs and install the brick veneer. For proper drainage, ensure the tips of the weep tabs are exposed when tooling the first mortar joint.

**INSTALLATION GUIDE**

**TotalFlash Installed Behind Rigid Insulation Board**

**TotalFlash Installed in Front of Rigid Insulation Board**

**Notes:**
- The use of Carborundum Saw blades to cut the Stainless Steel Drip Edge can result in a slight surface rust on any exposed metal.
- Muriatic Acid at any dilution is not recommended on Stainless Steel.
- Uses a 5/32" Drill Bit & 5/16" Nut Driver
Installation Instructions/Packing Slip

3  STEP THREE
Install 8” high sections of rigid insulation board against back up wall. Begin TotalFlash installation at the leftmost corner using the TotalFlash starter strip adjacent to corner drip using sealant / adhesive applied horizontally behind termination bar and drip edge and two beads vertically at ends of TotalFlash panel as shown to the right. Install subsequent sections of TotalFlash from left to right.

Sealant / Adhesive sets up quickly:
Install Drip Edge turn down bend, flush with the top corner of the veneer material. Install TotalFlash without a Drip Edge flush with the face of the veneer material following all current published industry standards. Create the crease at Drip Edge & backup wall until tight. Work the TotalFlash up the wall creating a smooth tight fit. Attach Termination Bar to the backup wall. Termination Bars may not align horizontally.

4  STEP FOUR
Install remaining sections using the lap system & adhesive, trim end section flush with corner drip. Caulk top of termination bar D. Use loose bricks to temporarily hold down TotalFlash while sealant / adhesive cures.

5  STEP FIVE
Install remaining rigid insulation board.

Notes:
• The use of Carborundum Saw blades to cut the Stainless Steel Drip Edge can result in a slight surface rust on any exposed metal.
• Muriatic Acid at any dilution is not recommended on Stainless Steel.
• Uses a 5/32” Drill Bit & 5/16” Nut Driver

INSTALLATION GUIDE INSIDE CORNER

1 **STEP ONE**
Install pre-formed 14" Corner Boot A using 1 bead of sealant / adhesive.

2 **STEP TWO**
Install 8" high sections of rigid insulation board against backup wall 12" from corner.

3 **STEP THREE**
Begin TotalFlash installation at the leftmost edge of the wall using the TotalFlash starter strip piece B (place it directly against the stainless steel corner piece previously set). Use sealant / adhesive applied horizontally behind termination bar and drip edge and two beads vertically at ends of TotalFlash panel as shown to the right. Trim off excess TotalFlash panel C . Install remaining sections using the lap system and sealant / adhesive. Caulk top of termination bar.

**Sealant / Adhesive sets up quickly:**
Install Drip Edge turn down bend, flush with the top corner of the veneer material. Install TotalFlash without a Drip Edge flush with the face of the veneer material following all current published industry standards. Create the crease at Drip Edge & backup wall until tight. Work the TotalFlash up the wall creating a smooth tight fit. Attach Termination Bar to the backup wall. Termination Bars may not align horizontally.

Notes:
• The use of Carborundum Saw blades to cut the Stainless Steel Drip Edge can result in a slight surface rust on any exposed metal.
• Muriatic Acid at any dilution is not recommended on Stainless Steel.
• Uses a 5/32” Drill Bit & 5/16” Nut Driver
**Installation Instructions/Packing Slip**

**STEP ONE**
Install pre-formed 14” Corner Boot A using 1 bead of sealant / adhesive.

**STEP TWO**
Trim the left side of the TotalFlash drip edge hem at 45° and install into inside corner with sealant / adhesive and termination bars screws supplied.

**STEP THREE**
Install rigid insulation on top of TotalFlash. Install brick veneer above lintel.

**STEP FOUR**
Trim top of Corner Boot flush with Termination Bar. Caulk top of termination bar D. Loose brick units can be used to temporarily hold down TotalFlash while sealant / adhesive cures.

**STEP FIVE**
Begin TotalFlash installation at the leftmost edge of the wall using the TotalFlash starter strip piece (place it directly against the stainless steel corner piece previously set). Use sealant / adhesive applied horizontally behind termination bar and drip edge and two beads vertically at ends of TotalFlash panel as shown to the right. Trim off excess TotalFlash panel.

**Notes:**
- The use of Carborundum Saw blades to cut the Stainless Steel Drip Edge can result in a slight surface rust on any exposed metal.
- Muriatic Acid at any dilution is not recommended on Stainless Steel.
- Uses a 5/32” Drill Bit & 5/16” Nut Driver

**INSTALLATION GUIDE B**
**Window Head Flashing**
TotalFlash Installed in Front of Rigid Insulation Board

For even faster installation contact Mortar Net Solutions® to inquire about TotalFlash window head panels made to the exact size needed.
Installation Instructions/Packing Slip

**STEP THREE**

Install first section of TotalFlash adjacent to end dam using sealant / adhesive and screws. Trim TotalFlash to fit opening.

For larger openings, install additional TotalFlash sections using the integrated lap system, sealant / adhesive and screws.

**STEP FOUR**

Caulk top of Termination Bar.

**STEP FIVE**

Install remaining rigid insulation board and install brick veneer.

**BEFORE PROCEEDING:** If you have questions or need more information, please contact Mortar Net Solutions® at 800-664-6638 or go to www.mortarnet.com
