MOISTURE MANAGEMENT FOR MASONRY

MortarNet[®] Ultra

Patented, dual-layered mortar collection device

Introducing MortarNet[®] Ultra, from Mortar Net Solutions – Masonry Division of Keene Building Products.

MortarNet[®] Ultra suspends mortar droppings above the flashing and weeps, so they stay clear and unobstructed. The patented dual layers help provide compressibility within inconsistent cavity widths, while maintaining the drainage and ventilation you can expect from a MortarNet product.

Weep holes must be used with MortarNet[®] Ultra to allow effective moisture drainage and wall drying. Mortar Net recommends WeepVent or CellVent to help keep weep holes open and prevent insects from entering the cavity through the weeps.

Features

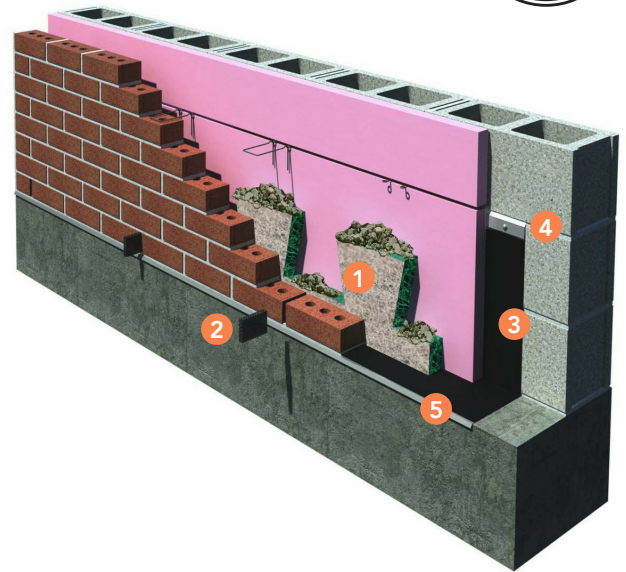

- Shape: Trapezoidal, dual levels
- Material: Structural strand polymer mesh bonded to a hi-loft, 90% open weave mesh

Benefits

- Compressible: Allows for variations in cavity width
- Preventative: Helps prevent efflorescence and damage from freeze-thaw cycles
- Handling: Lightweight, easy to transport, even on scaffolding
- Multi-story: Installs easily on brick ties in cavity walls
- Exposure: Will not degrade, oxidize or react with common building materials

Sizes and Packaging

| THICKNESS | HEIGHT | LENGTH | LF/BOX | BOXES/PALLET |
|-----------|--------|--------|--------|--------------|
| 1" | 10" | 5' | 100 | 24 |
| 1½" | 10" | 5' | 100 | 15 |
| 2" | 10" | 5' | 100 | 15 |

- 1 MortarNet Ultra
- 2 WeepVent or CellVent
- 3 Flashing Membrane
- 4 Termination Bar
- 5 Drip Edge
